#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7 & 8 recite the limitation "the plurality of." There is insufficient antecedent basis for this limitation in the claim.
3. Claims 3 & 4 recites the limitation "display position." There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Danna (US 5221021). With respect to claim 1, Danna discloses a display portion of a working portion of a waste fuel hole at an outer surface of a tank (Fig. 4, item 58 & 32).

With respect to claim 2, Danna discloses the display portion being located below a chamber module (34).

As to claim 3, Danna discloses the display portion being a bead portion (Fig. 4).

As to claim 4, Danna discloses the bead portion being formed by projecting a bead portion to an inner side of the tank (Fig. 4).\

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Danna in view of Benjey et al. (US 6298540 B1). As to claims 5, 6, Danna discloses the claimed invention except for the bead portion being a plurality of non-continuous bead portions. However, Benjey et al. teaches a fuel tank having a plurality of non-continuous bead portions, thereby providing an alternate arrangement of bead portions. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the bead portion of Danna to have multiple noncontinuous portions as taught by Benjey et al. so as to provide an alternate bead arrangement.

With respect to claims 7, 8, Danna discloses the claimed invention except for the bead portion including a plurality of bead portions. However, Benjey et al. teaches a fuel tank having a plurality of non-continuous bead portions, thereby providing an alternate arrangement of bead portions. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the bead portion of

Danna to have multiple noncontinuous portions as taught by Benjey et al. so as to provide an alternate bead arrangement.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
